

Review strategy

- See review document with important topics
- Study highlighted slides and associated review questions
- Review quizzes
- Write own versions of map filter reduce find
- Use reduce to find the max or min of an array
- Review lab exercises
- NOT included in the exam: destructuring, dates, JSON

- Make mocha test for the circle exercise, include jsdoc for the methods
 - Show this to a TA
 - The circle object exercise is very important. This should be easier than writing your own versions of map filter reduce. It is critical that you can do something like the circle object exercise.
- Map, filter, reduce, forEach,
- How does return work?
 - Why no blank line after return

- Write code to loop through array and print out each element
 - Do this with each type of loop mechanism
 - For with indices
 - For of
 - For in
 - forEach
 - map
 - filter
 - reduce
 - find
